

NEW YORK
BUILDING
CONGRESS

A scenic photograph of a winding asphalt road through a forested area at sunset. The sun is low on the horizon, casting a warm glow over the scene. The road curves to the right, bordered by a metal guardrail. The background shows rolling hills and mountains under a hazy sky. The text is overlaid on a semi-transparent white map of New York State.

**BUILDING
CONGRESS
ACROSS
NEW YORK
STATE**

In every region across our state, Building Congress members bring to life the true meaning of New York's motto, Excelsior, as they build "Ever Upward."

The Building Congress represents over 500 organizations comprised of more than 250,000 skilled tradespeople and professionals, including architects, engineers, contractors, labor, owners, and all who play a role in building New York's iconic and essential structures.

With members working all across New York State, the Building Congress is hard at work advocating for statewide investment in infrastructure, housing, workforce development, and overall economic growth in New York. The projects our members build often have a regional and national significance as they include clean energy and public works projects, housing, mass transportation, cultural institutions, airports and other infrastructure projects, healthcare facilities, educational centers, entertainment and parks, manufacturing hubs, and so much more.

THIS REPORT HIGHLIGHTS MANY OF THE EXTRAORDINARY PROJECTS THAT BUILDING CONGRESS MEMBERS HAVE RECENTLY BUILT, OR ARE UNDER CONSTRUCTION, IN COMMUNITIES ACROSS NEW YORK STATE.

Construction activity is a key indication of a region's overall economic prosperity. From the first spark of a visionary new idea, and shovels hitting the dirt, to when that final ribbon is cut, Building Congress members are instrumental in building the most critical projects for future generations. These investments bring tens of thousands of good-paying jobs to local communities and put food on tables of homes all across the state.

In New York State, the construction industry employs over 380,000 workers, and the Building Congress is proud to advocate on behalf of projects that will keep New Yorkers employed, expand workforce training and development, improve the built environment, and serve as major economic drivers.

Together, let's build an even better New York.
